RSGB statement -40 Mhz in UK

"We have been approached by a couple of individuals wanting to conduct experiments in the band. Like all other research and innovation requests Ofcom receives we have put these through our Innovation and Trial licensing regime. If the coordination checks are passed, they are being issued with an Innovation and Trial licence. These are issued for up to 12 months on a non-interference, no protection and non-operational basis.

These are not Amateur Radio Special Research Permits and licensees do not fall under the Amateur Radio licence terms and conditions. Therefore, applicants are not required to have passed an amateur exam or hold a callsign. Although we are allowing this experimentation, we would like to make it clear that we have no proposals to allow wider amateur radio access to the 40 MHz band. <https://www.dx-world.net/rsgb-statement-concerning-40mhz-in-the-uk/>
